

# GMDN TERM DEVELOPMENT & RESULT CERTIFICATE

---

## APPLICATION

Date of Application: 12/03/2013 14:24:03  
Name of requestor: Ms. Genoa Atwood  
Company: Soma Access Systems LLC  
Address: Suite 4C, 109 Laurens Road, Greenville, 29607, USA  
Country: USA

---

Proposed Term: Ultrasound Guided Needle Kit

## RESULTING TERM

GMDN Term: Ultrasonic/electromagnetic-guided needle kit  
GMDN Code: 60443

---

Type of Term: P

---

Definition: A collection of sterile devices intended to be used during a needle entry procedure (e.g., central venous access, aspiration of pneumothorax) that combines ultrasonic and electromagnetic methods for needle guidance (e.g., needle depth data using Hall effect sensors virtually overlaid on ultrasound imaging). It typically includes the needle/cannula with a magnetic attachment, coupling gel, and casing intended to provide a sterile shield for a separate, compatible ultrasonic/electromagnetic transducer. This is a single-use device.
